

Call for abstracts: Funnel Beaker junior conference

We are pleased to inform you of our upcoming junior conference themed: the Funnel Beaker period. The number of people working within this area of study is vastly growing, therefore we would like to take the opportunity to connect one another in the same discipline! The conference will (with reservation) take place in hybrid form at the Hunebedcentrum in Borger (Drenthe) on the 26th of January 2022 with physical presenters, an audience, and a live stream connection. We will strictly follow the governmental restrictions regarding the COVID pandemic.

In order to bring this conference to a success, we are looking for BA/BSc, (R)MA or PhD-students (or recent graduates) who would like to present their research on, for example: the Funnel Beaker period, another contemporaneous Neolithic group such as Vlaardingen, or a subject regarding Funnel Beaker megaliths.

Are you interested to present your research? Let us know by sending us an email at juniorcongrestrb@gmail.com. Include your name, institution, email address and an abstract (max. 300 words) of the research you would like to present, before **the 20th of December 2021. We hope to hear from you soon!**
